English

Portuguese

Statistician with a Master's in Big Data and a specialization in Risk Economics and Information, with professional experience in advanced analytics, BI, and Artificial Intelligence. Proven track record leading digital transformation projects across several Latin American countries for strategic sectors such as healthcare, telecommunications, and insurance. Expert in data architecture, data mining under CRISP-DM methodology, predictive, associative and classification models, machine learning, and strategic data visualization. Extensive experience in dashboard and KPI design with certified data visualization and statistical modeling tools. Proficient in generative AI tools — ChatGPT, Claude, and Gemini — applied to data analysis, workflow automation, research, information synthesis, and content generation. Participant in the Global Management Immersion Experience (GMIX) program at Stanford Graduate School of Business and project coordinator at MIT's G-Lab. Lecturer in Quantitative Analysis in graduate programs at Politécnico Gran Colombiano and trained as a Data Science Citizen by Colciencias-MINTIC. **With 28 years of work experience and 18 years of professional experience;** family man, years old.
